Guidelines for Presentation

Flow:

1. Introduction
   - brief background info about the province/study area (ex. site description, extent, location, known for, number of barangays); awards/recognitions received
   - importance of mangroves to the community
2. Status of mangroves in the province/study area
   - extent - natural, planted, restored
   - maps (if available, before and after management or after disturbance such as typhoons)
   - number of restoration/rehabilitation projects
   - initiatives on mangrove conservation other than mangrove planting
   - location and size/extent of degraded mangroves
   - perceived threats to mangrove ecosystem
3. Mangrove Protection and Management
   - Rehabilitation programs (process); funding source; year started
   - Monitoring and Evaluation (growth and survival rate)
   - Impacts of mangrove rehabilitation in terms of ecosystem and socio-economic contributions (e.g. food, income)
4. Summary and Recommendations
5. References

- Each province is allotted with 15 mins for presentation, with Q&A;
- Each province is allotted with 6 pages for their State of the Mangrove Report (including figures, graphs and tables). If the space allotted is not enough, it can be included in the Appendix portion;
- Please do send the presentations (PowerPoint or PDF) one week before the Summit (between March 12 – 16, 2018).

Thank you very much!
